Resourcing innovative minds, materials & technologies to solve unique design applications

Printed Any Size | Colored Any Stain | Shaped 3D | Finished (any) | Laminated

Leather

**All it takes is a little Horse Hair,
Your Favorite Blue Jeans,
Flowers from Prom, or the
Tobacco Fibers from your last
cigarette before you quit.
*Oh and don't forget your favorite perfume!***

Ambiance Papers can be inlayed with actual fibers (horsehair shown), printed, Class A Fire retarded and easily applied to most any surface.

That's all you need. At Lenderink Technologies we can create a fabulously custom, scented if desired, handcrafted cotton fiber paper, Class A fire-retarded if needed and ready to apply to virtually any surface. Any memory can become an intimate part of your new design!

Lenderink's unique hand made surfaces are also available in translucent surfaces for use in shades and window coverings where the beautiful effect of light transfer is displayed with silhouettes of the various deco/memory additives.

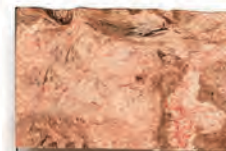

Banana Fiber Veneers

These are just a few of the limitless configurations we developed. All are manufactured in the USA and available in sheets or rolls 24" wide

**We do amazing things with surface application
and wall covering materials technology**

**Banana Fiber, Printed Leather, Cork,
Bark, Coconut Shells, and our
Real Wood and Micro-Thin Wood Veneers**

Eco-friendly bark surfaces

*Expansive selection of
exciting veneers from around the world!*
